# BUS TRANSFORMATION PROJECT

Technical Team Meeting November 30, 2018

#### Agenda

Agenda item	Time
1 Progress Update	5 mins
2 Strategic Considerations Overview of Choices Voting Exercise Discussion	60 mins
<ul> <li>Strategy Development</li> <li>Overview of Process</li> <li>Analyses to support strategic considerations</li> </ul>	20 mins
Next Steps & Conclusions	5 mins

1

# **Progress Update**

#### Since our last meeting...

Discussed strategic considerations with Project Committees:

- ESC: 10/3 and 11/7
- SAP: 11/5
- WMATA Leadership Team: 10/18 & 11/20

Engaged with riders and non-riders at 20 Pop-Up meetings:

- 7 in DC
- 7 in MD
- 6 in VA

Started regional transit system data analysis:

- Inventorying jurisdictional data received
- Began development of regional service types

#### **Survey Responses**

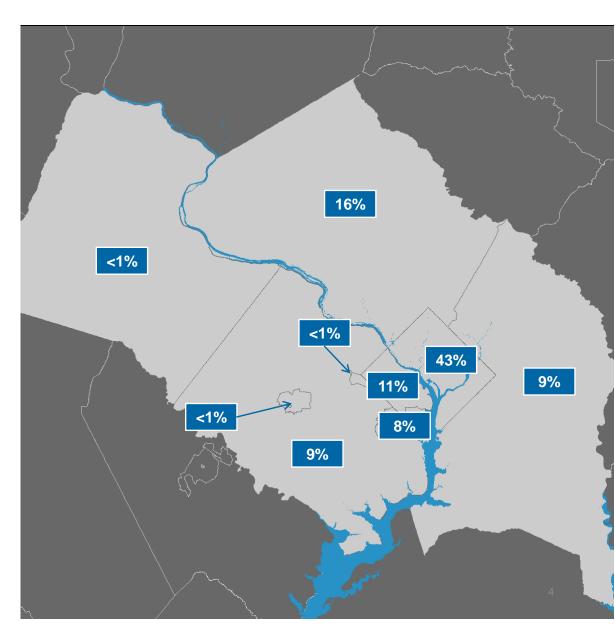

5,679 completed surveys

Strong geographic distribution of survey responses driven by:

- Geographically distributed pop-up meetings (20)
- Bilingual social media ad campaign
- Coordination with local Chief Information
   Officers

Geographic distribution is fairly representative of regional bus ridership.

Note: Some respondents (~2%) reside outside of the region, so the totals shown are less than 100%. These percentages are based on the total amount of respondents who gave a location; 30% of survey respondents gave no location information at all.

#### **Survey Responses**

## 16% of survey respondents are Low-Income

62% of survey respondents ride the bus at least once per week

45%

of survey respondents report that they are not-white

mirroring the region's racial composition

\*45% is the % of the respondents who gave race information. Only 33% of all survey respondents indicated that they were not-white. 5

\*Low income defined as living in a household with income less than \$30,000 a year \*16% is the % of the respondents who gave income information. Only 11% of all survey respondents indicated that they were low income

#### **Survey Results**

# Compared to three years ago,

more often ride local bus less often

ride local bus

#### Respondents choose to ride the local bus because:

- "It is the closest transit option to my home or work."
- "It is the most affordable option."
- "It is easy to use."

#### Respondents choose not to ride the bus because:

- "The bus comes to infrequently."
- "The bus is too slow."
- "Buses don't go where I need to go."

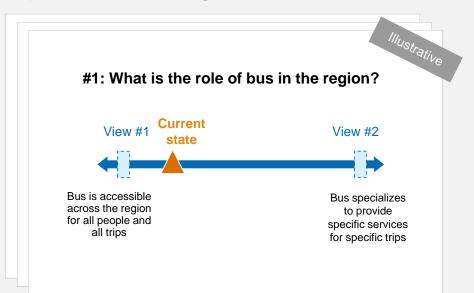

# **Strategic Considerations**

PRELIMINARY

#### **Strategic considerations** Questions to be considered in sequential order Current state of the system Range of options-What is the role of Buses (multi-Buses are accessible Buses specialize to provide specific passenger publicly available across the region for all services for specific trips people and all trips vehicles) in the region? Regional Level of regional commitment to No regional preferential Preferential treatment for Buses on speeding up Buses? treatment for Buses roadways across jurisdictions 3 What is the regional governance / No regional coordination Introduction of regional governance body delivery model for bus? on bus or regional service provider (4 Metrobus continues to Metrobus focuses on centralized Metrobus What business should Metrobus operate all functions as it functions only (e.g., procurement, be in? marketing, fare systems management) does today 5 Metrobus operates no routes (no buses What services should Metrobus Metrobus operates all say "Metrobus"); all routes operated by operate? routes across the region other bus operators

#### *Live poll*: Share your initial views on each strategic consideration

## <u>Considerations #1-5</u>: Vote for the point on spectrum where region **should** land

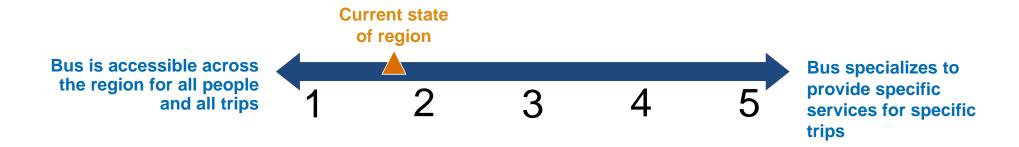

To join the live poll:

From your cell phone...Send a text to the phone number: 22333The content of your text should be: Buses

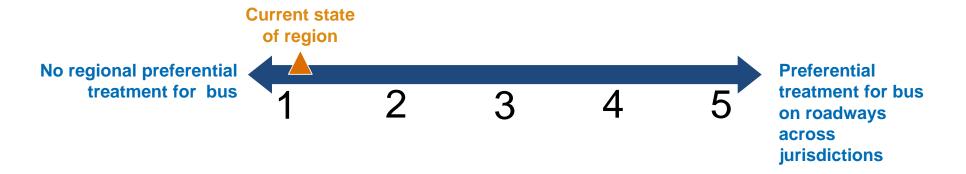

From your computer or tablet... Go to **PollEv.com/BUSES** 

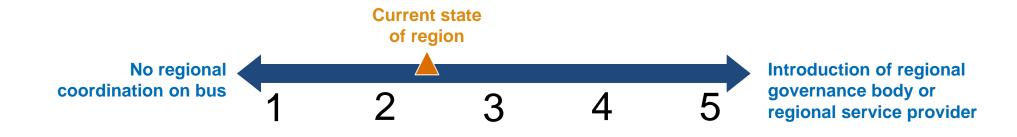

#### **Role of bus?**

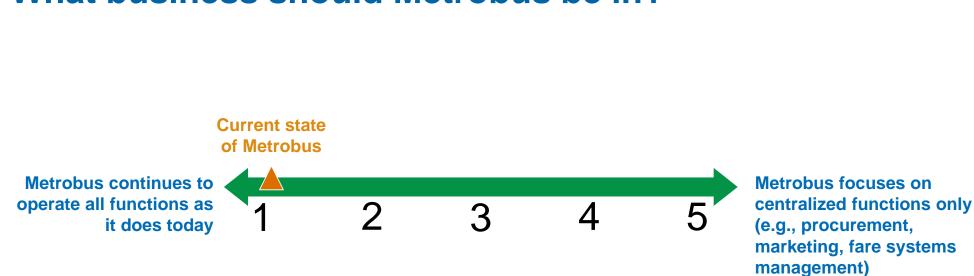

# Regional governance / delivery model for bus?

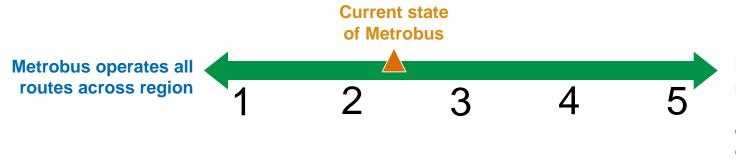

#### What business should Metrobus be in?

4

#### What services should Metrobus operate?

Metrobus operates no routes (no buses say "Metrobus"); all routes operated by other bus operators 〔5〕

# **Discussion of poll results**

# **Strategy Development & Analysis**

#### What is the role of 'Buses' in the region (multi-passenger, publicly available vehicles)?

Planned Analysis	Input Data
<ul> <li>Develop density thresholds by service classification</li> <li>Analyze impacts of setting service levels across the region based on the density thresholds</li> <li>Compare costs for different scenarios</li> </ul>	<ul> <li>Existing route network</li> <li>Existing revenue hours</li> <li>Transit potential/propensity analysis</li> <li>Operating costs</li> </ul>

Draft

#### Level of regional commitment to speeding up bus?

#### **Planned Analysis**

Analyze the benefits and costs of prioritizing bus under two scenarios:

- 1. Currently planned bus lanes + targeted TSP
- 2. Bus Lanes + integrated TSP throughout the Priority Corridor Network

#### Input Data

- Jurisdiction BRT corridor studies and deployments
- Performance data from jurisdictional TSP deployments
- Priority Corridor Network travel time and reliability experience
- Peer region experience—specific KPIs and costs

#### <sup>3</sup>What is the regional governance / delivery model for bus?

Planned Analysis	Input Data
<ul> <li>Define 2-3 potential organizational models for bus service in the region</li> <li>Assess benefits and challenges associated with implementation</li> </ul>	<ul> <li>Benchmark data on key characteristics of regional organization in similar regions         <ul> <li>Structure</li> <li>Responsibility</li> <li>Level of authority</li> <li>Funding requirements</li> </ul> </li> </ul>

#### <sup>4</sup>What is the right business model for Metrobus?

#### **Planned Analysis**

#### Input Data

Identify 2-3 potential support-as-a-service models for Metrobus, including:

- Functions: What specific support does Metrobus offer (e.g., marketing, procurement, digital)?
- Engagement model: How does Metrobus engage with other operators?
- Funding: How does Metrobus charge for centralized support provided to other operators?

Benchmark data on key characteristics of centralized support organizations in similar regions

- Amount spent on centralized functions
- Estimated scale efficiencies

#### <sup>5</sup>What services should Metrobus operate?

# Planned AnalysisInput DataAnalyze costs and risks of alternative<br/>Metrobus operating scenarios, including the<br/>cost burden to each jurisdiction• Service type definitions<br/>• Operating cost per route/hour/agency<br/>• Route level ridership

Example scenarios:

- 1. Metrobus only operating interjurisdictional routes
- 2. Metrobus operating interjurisdictional routes, Metrorail feeder routes, and/or along high density corridors.

• Current and alternative cost allocation formulas

# Next Steps

#### **Next Steps**

What	When
Operator Survey open	until December 16
Elected Official and Board Member outreach	ongoing through December and January
Schedule a conversation with your department/director/leadership, etc Which goals are their priorities?	
What are their "non-negotiables"?	

# Next Meeting: January 25, 10:00 am
